**Subject:** RE: Coal combustion residual - AES questions  
**Attachments:** CCR Beneficial Use Information from CCR Disposal Rule.docx

Hello Kevin,

As follow-up to our 4/19/17 call, I am forwarding (attached file) the promised information/resources on encapsulated and unencapsulated beneficial uses as it relates to the CCR Rule; and information and resources to assist in making the fourth environmental criterion of the beneficial use definition. The resources are hyperlinked in the attachment. If you/HDHO have further questions on beneficial use I can arrange another call with HQ.

AES hasn't contacted me as of yet with any additional questions regarding the CCR regulations, or the unencapsulated beneficial use justification. The attached information might be of use to them. If they have further questions, I am happy to talk with them and can arrange a call with the CCR beneficial use people in DC.

Thank You,  
Steve

**Subject:** Coal combustion residual questions - AES

Steve,

I thought I should let you know that AES has additional questions regarding the CCR regulations, primarily on the unencapsulated beneficial use justification. I suggested that AES contact you directly, and that if headquarters needs to be contacted, it should be coordinated with you. I provided AES your email address, and they should be in touch soon.
